

STEELCRAFT®

The GRAINTECH finishes look like wood while providing the benefits of steel, making them ideal for exterior openings in schools, hospitals, nursing homes, apartment buildings and dormitories. The exclusive engraving and staining process simulates wood finishes – including birch, ash, oak, maple, mahogany and walnut – along with custom finishes or primer. Unlike veneer or solid wood doors, GRAINTECH will never warp, crack, peel or bow.

Steelcraft GRAINTECH Series Finishes

GRAINTECH is baked on with a clear coat finish that resists UV light and graffiti. Deziigner™ trim flush light kits are stained to match the door. It is compatible with fire-rated doors and available for the CE, L and T Series doors.

MARVIN COMMERCIAL DOOR

Marvin Commercial Doors have it all: rugged durability, sophisticated design, a variety of customization options and industry-leading innovation. The commercial door is made to commercial standards and manufactured on a dedicated production line using construction and assembly processes that are different from our residential doors.
